

Invited symposium: Symposium in honor of Marvin Zuckerman

Moderators: Prof. Dr Đorđe Čekrlija and Ma Lana Vujaković

The contribution of Marvin Zuckerman to personality psychology is extraordinary. Great amount of conducted researches, publications and citations clearly show it. By involving findings from physiology, endocrinology, brain biochemistry and genetics in his work on personality, he developed a personality constructs which show a great usefulness in explaining human behavior. In the age of 90, Marvin Zuckerman died on November 28<sup>th</sup>, 2018 and he left a great legacy behind him. The goal of the symposium is to express honor to professor Zuckerman and to discuss the status and perspectives of the psychobiological personality theory. Within the symposium the Zuckerman's and Gray's model of personality will be examined, as well as the effects of gender and AMMF personality traits on alcohol use. Moreover, position of Emotional competence and Dark Triad measures will be considered within the Alternative Five Factor Model of personality.
